Bed Bug Control Preparation Guidelines

Your home will be treated for bedbugs on: (date) _____ at (time) _____. All people and pets must be absent from your home during the application, and for a minimum of 4 to 6 hours after the application. If anyone has any severe medical conditions, they may want to stay away for a longer period.

The chemical to be used is:

- Tempo WP: PCP# 25673: _____%
- Dagnet FT: PCP# 24175: _____%
- Prelude 240E: PCP# 26509: _____%

We ask your cooperation by preparing your home in the following way:

Bathroom: Remove all items from bathroom shelves, vanities and counters. Place these items in the bathtub and cover with a sheet. Remove bathroom plumbing inspection plate to allow access under the tub and shower.

Bedrooms: Remove all items from floor and shelf areas. Remove bedding and stand up mattresses and box springs. Please ensure access to the bed frame and baseboards as this is very important! Move all furniture away from the wall 12 to 18 inches. Wash sheets and blankets, and place in plastic bags. Empty the dressers and night tables of all items. Place all items in plastic bags. Leave the drawers in the dresser and night tables. Launder all clothing that has been exposed to bed bugs. Store your clean clothing in pest-proof containers, or bags, to minimize the chance of recontamination. Blankets and pillows cannot be treated; these items should be washed and/or replaced more often.

Living Room: Move furniture away from the wall at least 12 inches. Remove all items from the floor. Ensure that all upholstered furniture is free from all items. Your couches, chairs etc, will be inspected for bed bugs.

Kitchen: Move appliances away from the walls allowing the technician access behind the appliances. Remove all items from the lower kitchen cabinets.

Children's toys: Pick up and place in plastic bags or covered toy boxes. Children's stuffed animals can be washed and bagged.

Storage areas: Ensure access to baseboards, walls and shelves in the basement and storage areas by moving everything at least 12 inches from the wall.

Fish tanks: Shut off pumps and seal tank openings with plastic.

Vacuum your home entirely, including mattresses, box springs, pillows and upholstered furniture. Place the vacuum bag in a garbage bag in case an insect or egg was picked up. Discard the garbage bag in the solid waste disposal bin immediately.

Re-entry: You may return home on: (date) _____ at (time) _____. Upon re-entry to your premises, please ensure that all vanity tops, counter tops, cutting boards, fridge tops and stove tops are washed with soap and water prior to placing items on them. **Please do not wash cupboards, shelves and drawers for at least 30 days to allow the chemical to continue working.** Place clean shelf or newspaper on these surfaces before you return items. Open windows for 15-20 minutes to remove stale air.

If you have any questions about the details of the preparation or you need further information about the pesticides to be used, please call *Best Control Pest Control* at (403) 273-3025 or (403) 932-4383.

In case of emergency or accidental poisoning, please contact the Poison Control centre at: (403) 944-1414.
